

EMTREE CHANGES IN 2011

Many terms are added to EMTREE each year. Most are new concepts (e.g. new drugs or diseases), but some new terms are reformulations of existing concepts, and replace existing preferred terms. EMTREE codes are also added or deleted in order to maintain and improve access to the tree structure. These changes are summarized below and specified in detail on the following pages.

EMTREE Terms Added in 2011

2407 new concepts have been added to EMTREE as preferred terms in 2011:

- 1723 drug terms (terms assigned to facet D, Chemicals and Drugs).
- 684 medical terms (terms not assigned to facet D).

These terms have been assigned creation date 2011 and are listed as *Terms Added* on the following pages. Note that they will generally have been indexed as candidate terms prior to 2011.

The list of *Terms Added* excludes 164 new terms which replace older preferred terms. These terms are listed as *Terms Changed* (see below, beginning page I-8).

EMTREE Terms Changed in 2011

172 terms (16 medical and 156 drug terms) from EMTREE 2010 have been replaced by 172 different terms in 2011 (16 medical and 156 drug terms). 164 of the replacement terms are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2011; the remaining 8 replacement terms (2 drug and 6 medical terms) were already present in EMTREE 2010. No drug terms were replaced by a medical term. No medical terms were replaced by a drug term.

Changes are presented in alphabetical order of the *new* terms. Not shown are 0 drug terms redefined as medical term and 0 medical terms redefined as drug term without any change in the term itself. So there is a net transfer of 0 drug terms to medical terms. Not shown either are terms removed altogether, i.e. without making them synonyms of replacement terms (1 medical, 0 drug).

Overall, EMTREE 2011 has grown by 2398 preferred terms compared with EMTREE 2010. This growth represents a net increase of 1721 drug terms and 677 medical terms. (See below, beginning page I-34.)
